

## Lutron Operation Guidelines

- Lutron is operated through their own IOS/Ipad app for the San Jose Convention Center  
Username: wfairweather  
Password: 1234
- First open-up the app and select the desired location to which you want to operate in.
- Locations: Grand Ballroom, Grand Ballroom Pre-function, Lower Level, Lower Level Pre-Function, Executive Ballroom, and various parts of the concourse.
- When you select the desired location, you can now adjust the lighting levels via faders on the app itself.
- Each linear MR 13 / Pendant is apart of a “Zone” which is how this was originally engineered. In other words, every light that you adjust controls at least 4 or 5 different fixtures at once.
- Depending on the use of the system, you can also design presets to your liking. Edit Scene, adjust, and save as preset.
